

Crocin 650 Tablet Uses

Paracetamol It is a widely available over-the-counter drug sold generically or under various brand names, including Tylenol and Panadol. products containing paracetamol to limit its amount to no more than 325 mg per tablet or capsule and began requiring manufacturers to update the labels of all Paracetamol, or acetaminophen, is an analgesic and antipyretic agent used to treat fever and mild to moderate pain 125af7b5fc

Paracetamol relieves pain in acute mild migraine and episodic tension headaches. At a standard dose, paracetamol slightly reduces fever, though it is inferior to ibuprofen in that respect: the benefits of its use for fever are unclear, particularly in the context of fever of viral origins. Paracetamol is effective for pain after wisdom tooth extraction, but it is less effective than ibuprofen. The combination of paracetamol and ibuprofen provides greater analgesic efficacy than either drug alone. The pain relief paracetamol provides in osteoarthritis is small and clinically insignificant. Evidence supporting its use in low back pain, cancer pain, and neuropathic pain is insufficient. Paracetamol is the first-line treatment for pain and fever in pregnancy; no causal association with neurodevelopmental disorders has been established, while untreated pain and fever can harm the mother and fetus. 125af7b5fc Saffron's taste and iodoformic or hay-like fragrance result from the phytochemicals picrocrocin and safranal. It also contains a carotenoid pigment, crocin, which imparts a rich golden-yellow hue to dishes and textiles. Saffron quality is objectively measured under the ISO 3632 standard, which evaluates the concentration of active phytochemicals—specifically crocin (color), picrocrocin (taste), and safranal (aroma) via spectrophotometric laboratory analysis. The grading depends largely on the ratio of dark red stigmas to yellow styles, with higher concentrations of red parts yielding premium-grade products. Although market prices fluctuate, premium saffron regularly exceeds US\$5,000 per kilogram, sustained by its labor-intensive... 125af7b5fc

Saffron The vivid crimson stigma and styles (in industry jargon: 'threads') are collected and dried for use mainly as a seasoning and colourant in food. Saffron crocus was slowly propagated throughout much of Eurasia and later brought to parts of North Africa, North America, and Oceania. Saffron Saffron (SAF-rən, -ron; Persian: زعفران, romanized: zafarān) is a spice derived from the sterile autumn-blooming flower of *Crocus sativus*, commonly known as the "saffron crocus". It also contains a carotenoid pigment, crocin, which imparts a rich golden-yellow hue to dishes and textiles. phytochemicals picrocrocin and safranal 125af7b5fc

At a recommended maximum daily dose for an adult of three... 125af7b5fc
