Bias against left-handed people from the Latin *caecare*, in reference to the habit of performing ablutions with the left hand, leaving the right hand "clean". About 90 percent of the world's population is right-handed, and many common articles are designed for efficient use by right-handed people, and may be inconvenient, painful, or even dangerous for left-handed people to use. However, other sources suggest Bias against people who are left-handed includes handwriting, which is one of the biggest sources of disadvantage for left-handed people, other than for those required to work with certain machinery. These may include school desks, kitchen implements, and tools ranging from simple scissors to hazardous machinery such as power saws ef298e0d45

Hand washing Drying of the washed hands is part of the process as wet and moist hands are more easily recontaminated. Meta-analyses have shown that regular hand washing in community settings can significantly reduce respiratory and gastrointestinal infections. If soap and water are unavailable, hand sanitizer that is at least 60% (v/v) alcohol in water can be used as long as hands are not visibly excessively dirty or greasy. Hand hygiene is central to preventing the spread of infectious diseases in home and everyday life settings. Draw reins and running reins is best practice to stop use as soon as the desired response is given. Running reins (or western-style draw reins) are used by many trainers to teach the Draw reins and running reins are pieces of riding equipment used for training that use the mechanical advantage of a 'single movable pulley' to cause the horse to bring its head down and inward. While a regular rein is the strap that attaches to the bit and is held by the rider, these types of reins slide through the bit ring, adding leverage to the rider's hands and arms, allowing the rider to force the horse's head into a desired position ef298e0d45

Usage of the term in English riding and Western riding disciplines refers to slightly different designs that nonetheless work on essentially the same leverage principles. ef298e0d45 Beyond being inherently disadvantaged by a right-handed bias in the design of tools, left-handed people have been subjected to deliberate discrimination and discouragement. In certain societies, they may be considered unlucky or even malicious by the right-handed majority. Many languages still contain references to left-handedness to convey awkwardness, dishonesty, stupidity, or other undesirable qualities. In many societies, left-handed people have been historically forced as children to use

Dooring car whose ergonomic design strongly favors far-hand use for opening while making the near hand habit awkward. The zone can be almost zero for a vehicle with sliding or gull-wing doors or much larger for a truck. The width of the door zone in which this can happen varies, depending upon the model of car one is passing. In many cities across the globe, doorings are among the most common and injurious bike-vehicle incidents. Any passing vehicle may also strike and damage a negligently opened or left open door, or injure or kill the exiting motorist or passenger. Dooring can happen when a driver has parked or stopped to exit their vehicle, or when passengers egress from cars, taxis and rideshares into the path of a cyclist in an adjacent travel lane. Violin technique The strings are sounded either by drawing the bow across them (arco), or by plucking them (pizzicato). The left hand regulates the sounding length of the strings by stopping them against the fingerboard with the fingers, producing different pitches. Collapsing the wrist to "support" the violin with the heel of the hand is an unfortunate habit that many novice players fall into, and Playing the violin entails holding the instrument between the jaw and the collar bone (see below for variations of this posture). repetitive strain injury ef298e0d45
