Measuring your ring size at home is actually pretty easy, especially once you know a) how to size your ring and b) what the average ring size is – so what you should be looking for? First off, you should start with a ring sizer. An at-home ring sizer allows you to effectively measure your finger. Slip your finger into the measuring ring to figure out what your exact size is. You should measure your finger multiple times with this method, as our fingers shrink and expands due to weather and daily activity. Just make sure that the size feels comfortable. You want it to fit on your finger snugly, without it feeling too tight. You don't want your ring to slip on or off. If it's too loose, it could fly off your finger simply by waving your hand. Instead, you want a ring that fits snug on your finger, without feeling like a death grip. People with slender fingers and thick knuckles should consider going a half size up, as it will make it easier to get their ring over their knuckles without it being too difficult to either get on or off. 36c4dab0ce Research 36c4dab0ce SIZE MATTERS for WOMEN and MEN! When we talk about rings, it's best to know that rings are often sized between a size 3 to a size 14. Sizes can go larger, but that tends to be the average among the entire population. Men tend to wear anywhere between a size 7 to a size 14 - from the slender fingers

of a pianist to the thick fingers of a construction worker. The average mens ring size is a size 9. 36c4dab0ce What does it mean? Ring sizes are measured in half increments. So, you go from a size 8 to 8.5 to 9 to 9.5 and so on. But what do the actual sizes stand for? Well, they are simple readings of diameters. For instance, a size 7 has a diameter of 17.3 millimeters, meanwhile, a size 7.5 measures 17.7 mm and then a size 8 measures at 18.1 mm. So every half size increases by 0.4 mm in diameter. Knowing this, you can actually find your ring size with little work.
