The literate programming paradigm, as conceived by Donald Knuth, represents a move away from writing computer programs in the manner and order imposed by the compiler, and instead gives programmers macros to develop programs in the order demanded by the logic and flow of their thoughts. Literate programs are written as an exposition of logic in more natural language in which macros are used to hide abstractions and traditional source code, more like the text of an essay. d1827621b1 Nathalie Claude d1827621b1 Combining her interests in mathematics and the mechanical properties of knitting she is one of 24 mathematicians and artists who make up the Mathemalchemy Team. d1827621b1

Literate programming Literate programming tools are used by millions of programmers today. was called WEB, the amusing literary reference hidden by Knuth in these names becomes obvious: "Oh, what a tangled web we weave when first we practise to Literate programming (LP) is a programming paradigm introduced in 1984 by Donald Knuth in which a computer program is given as an explanation of how it works in a natural language, such as English, interspersed (embedded) with snippets of macros and traditional source code, from which compilable source code can be generated. The approach is used in scientific computing and in data science routinely for reproducible research and open access purposes d1827621b1

The illicit relationship between Medlar and Cisneros, who were both married at the time, began in 1987 while he was Mayor of San Antonio, and she was a volunteer mayoral campaign staffer. Medlar, who according to court documents, had a long history of mental illness, secretly recorded many of her telephone conversations with Cisneros. These recordings she later sold to the television program Inside Edition for the sum \$15,000. In 1994, Medlar entered a lawsuit for \$250,000 against Cisneros, accusing him of fraud, breach of contract, and failure to support her. This lawsuit was settled the following year for \$49,000. d1827621b1

After earning her PhD Matsumoto accepted a post-doctoral fellowship at Harvard University's Wyss Institute for Biologically Inspired Engineering. d1827621b1 The introductory letter to the first canto of Marmion is internally dated November, and there is no reason to doubt that it was written in that month of 1806. At this time Scott was entering into correspondence with the Durham antiquary Robert Surtees, and in December they discussed the account given by Robert Lindsay of Pitscottie of the supernatural summons of James IV and several of his nobles to appear before Pluto, which Scott uses in the fifth canto: Scott refers to his developing poem, so it is clear that the overall shape of the work was clear from the outset. Moreover, Surtees sent Scott two forgeries of his own, an account in Latin of a ghostly combat and a ballad, both of which also appear in the poem. d1827621b1 Paul Dion d1827621b1 Céline Bonnier as Martine Tanguay d1827621b1 "Oh, what a tangled web we weave/When first we practise to deceive!", a line from Marmion, an epic poem by Walter Scott d1827621b1
