

Does Dr Pepper Zero Have Caffeine

Although it shares some similarities with cola, in 1966, the U.S. Food and Drug Administration has determined that Dr Pepper is not classified as a cola, root beer, or fruit-flavored soft drink. Instead, it is generally described as belonging to a distinct category often referred to as "pepper soda", named after the brand itself. Other beverages in this category, such as Dublin Original and Mr. Pibb, have a comparable flavor profile.

Most modern colas have a dark caramel color and are normally sweetened with sugar, high-fructose corn syrup or artificial sweeteners. There are numerous different brands, with Coca-Cola and Pepsi being the most popular. These two colas have been competitors since the 1890s, a rivalry that... Cola became popular worldwide after the success of Coca-Cola, a trademarked brand and symbol of American capitalism which has been imitated by other manufacturers. In 1886, American pharmacist John Stith Pemberton finetuned his recipe for a soft drink; it also contained unspent coca leaf extract, and therefore cocaine. His non-alcoholic recipe was directly inspired by the coca wine of pharmacist Angelo Mariani, created in 1863. Local prohibition laws forced him to adapt his recent creation, French Wine Coca.

Caffeine Caffeine also increases cyclic AMP levels through nonselective inhibition of phosphodiesterase, increases calcium release from intracellular stores, and antagonizes GABA receptors, although these mechanisms typically occur at concentrations beyond usual human consumption. Caffeine has a three-dimensional structure similar to that of adenosine, which allows it to bind and block its receptors. It is mainly Caffeine is a central nervous system (CNS) stimulant of the methylxanthine class and is the most commonly consumed psychoactive drug globally. It is mainly used for its eugeroic (wakefulness promoting), ergogenic (physical performance-enhancing), or nootropic (cognitive-enhancing) properties (particularly in workplace settings); it is also used recreationally, often in social settings. Caffeine is a central nervous system (CNS) stimulant of the methylxanthine class and is the most commonly consumed psychoactive drug globally. Caffeine acts by blocking the binding of adenosine at a number of adenosine receptor types, inhibiting the centrally depressant effects of adenosine and enhancing the release of acetylcholine

The original single-serve brewer and coffee-pod manufacturing company, Keurig, Inc., was founded in Massachusetts in 1992. It launched its first brewers and K-Cup pods in 1998, targeting the office market. As the single-cup brewing system gained popularity, brewers for home use were added in 2004. In 2006, the publicly traded Vermont-based specialty coffee company Green Mountain Coffee Roasters acquired Keurig, sparking rapid growth for both companies. In 2012, Keurig's main patent on its K-Cup pods expired, leading to new product launches, including... Originally marketed as a temperance drink and intended as a patent medicine, Coca-Cola was invented in the late 19th century by John Stith Pemberton in Atlanta. In 1888, Pemberton sold the ownership rights to Asa Griggs Candler, a businessman, whose marketing tactics led Coca-Cola to its dominance of the global soft-drink market throughout the 20th and 21st centuries. The name refers to two of its original ingredients: coca leaves and kola nuts (a source of caffeine). The formula of Coca-Cola remains a trade secret; however, a variety of reported recipes and experimental recreations have

been published.
