Blood pressure is one of the vital signs—together with respiratory rate, heart rate, oxygen saturation, and body temperature—that healthcare professionals use in evaluating a patient's health. Normal resting blood pressure in an adult is under 120/80 mmHg according to the AHA and ACC, and under 120/70 mmHg according to the ESC, and over 90/60 mmHg, though low blood pressure is usually not... 7d4c16fc01

Blood pressure S2CID 23726657. Most of this pressure results from the heart pumping blood through the circulatory system. eMedicine. "Esophageal Varices: Article Excerpt by: Samy A Azer". Blood pressure is usually expressed in terms of the systolic pressure (maximum pressure during one heartbeat) over diastolic pressure (minimum pressure between heartbeats) in the cardiac cycle. Archived from the original Blood pressure (BP) is the pressure of circulating blood against the walls of blood vessels. It is measured in millimetres of mercury (mmHg) above the surrounding atmospheric pressure, or in kilopascals (kPa). doi:10. The difference between the systolic and diastolic pressures is known as pulse pressure, while the average pressure during a cardiac cycle is known as mean arterial pressure. When used without qualification, the term "blood pressure" refers to the pressure in a brachial artery, where it is most commonly measured. PMID 12533747. 1023/A:1021931508946 7d4c16fc01
