Use of pillows for comfort is evident in arboreal mammals, particularly members of Panthera and Hominoidea with several species observed selecting specific parts of tree branches for this purpose. Natural resting postures, such as the use of a laterally rotated arm or leg, may be superior to artificially created pillows in the reduction of stiffness and pain in the joints, and allows an animal to stay more alert to danger by keeping both ears open... cc24c8b506 In addition to conventional natural fabrics, new forms of synthetic protector or topper have appeared over the years including memory foam and spacer fabrics... cc24c8b506 Protect-A-Bed's mattress protector... cc24c8b506 == A == cc24c8b506 The simplest form of a mattress protector is a lightly quilted fitted sheet. It provides minimal protection against liquids and little or no protection from dust mite allergens. cc24c8b506 Although the surface of a mattress can be cleaned with a vacuum cleaner, it is very difficult to completely clean most standard mattresses. An unprotected mattress can become marked or stained quite quickly as perspiration produced throughout the night easily passes through a standard cloth sheet and creates a characteristic yellowish-brown tidemark where it's absorbed into the upper surface of the mattress. Mattresses are also susceptible to many other contaminants. cc24c8b506
