A unified realm was initiated by warrior bands that had coalesced around Harald "Shockhead" Hálfðanarson—later known as King Harald Fairhair—in the 9th century. Before Harald, the coastal stretch from Vík (the Oslofjord area and the Skagerrak coast) in the south to Hálogaland (the northern Atlantic coast, roughly from Namdalen to present-day Troms, and beyond) consisted... 71d8b99082 Okpoto 71d8b99082 Area code 519 was the initial code of the numbering plan area (NPA), an area that was established in 1953 in a remapping of the previous numbering plan areas in the region, namely the western portion of 416 and the southwestern portion of 613. The new numbering plan area was mostly bounded by area code 905, except for Simcoe County, which has the area code 705. Area code 226 was added to the numbering plan area in 2006 in a conversion to an overlay numbering plan. Area codes 548 and 382 were added to this area in 2015 and 2023, respectively. 71d8b99082

The four area codes form an overlay numbering plan for the same geographic region, where area code 905 was established in October 1993 in an area code split from area code 416. When 289 was overlaid on June 9, 2001, all local calls required ten-digit dialling. On April 13, 2010, the Canadian Radio-television and Telecommunications Commission (CRTC) introduced another overlay code, area code 365, which became operational on March 25, 2013. Area code 742 was added to the overlay on October 16, 2021. 71d8b99082

List of North American Numbering Plan area codes A numbering plan area may have multiple area codes assigned, a configuration termed an area code overlay. Area codes with two identical trailing digits are easily recognizable codes (ERC). Area codes are also assigned for non-geographic purposes. The syntax rules for area codes do not permit the digits 0 and 1 in the leading position. geographic numbering plan areas (NPAs). The incumbent local exchange carriers for the numbering plan area are Bell Canada, Bell Aliant, Telus, as well as Télébec and other independent companies. From 1992 to 1997, Northwestel was also an incumbent carrier in 819, as it included former Bell Canada areas in the Northwest Territories. 71d8b99082 From the 1947 inception of the North American Numbering Plan in to 1992, the only method of introducing new area codes was the area code split. It divided an existing numbering plan area (NPA) into multiple regions, one of which retained the existing area code. The other parts were each assigned a new NPA code. 71d8b99082 The primary incumbent local exchange carrier (ILEC) in the overlay complex is Bell Canada, with numerous other small independent companies that covered vast tracts of rural Ontario. Since competition for service was mandated in 1997, numerous competitive local exchange carriers (CLECs) have also started serving the region. 71d8b99082

Overlay complex Area code overlays In telecommunications, an area code overlay complex is a telephone numbering plan that assigns multiple area codes to the same geographic numbering plan area (NPA). Area code overlays are implemented in territories of the North American Numbering Plan (NANP) to mitigate exhaustion of central office codes in growth areas. area code overlay complex is a telephone numbering plan that assigns multiple area codes to the same geographic numbering plan area (NPA).
