1f29300eba Development of Sonic Generations began following the completion of Unleashed. Sonic Team sought to re-imagine the most popular aspects of the franchise in high-definition, and developed the game using the Hedgehog Engine. Each location and many bosses in the game are previously seen in an earlier entry in the series, with the game including numerous other references to past entries. Devil's Details and Dimps helped create the Windows and 3DS versions, respectively. The Windows version is noted for its active modding scene, where a dedicated community creates new gameplay mechanics... 1f29300eba Mannheim defined a generation (note that some have suggested

that the term cohort is more correct) to distinguish social generations from the kinship (family, blood-related generations) as a group... In the United States, the Great Depression of the 1930s and World War II in the early-to-mid 1940s caused people to have fewer children and as a result, the generation is comparatively small. It includes most of those who fought during the Korean War. Upon coming of age in the postwar era, Silents were sometimes characterized as trending towards conformity and traditionalism, as well as comprising the "silent majority". However, they have also been noted as forming the leadership of the civil rights movement and the 1960s counterculture, and creating the rock and roll music of the 1950s and 1960s. The theory states that a crisis recurs in American history after every saeculum, which is followed by a recovery ("high"). During this recovery, institutions and communitarian values are strong. Ultimately, succeeding generational archetypes attack and weaken institutions in the name of autonomy and individualism, which eventually creates a

tumultuous political environment that ripens conditions for another crisis. 1f29300eba

Theory of generations According to Mannheim, people are significantly influenced by the socio-historical environment (in particular, notable events that involve them actively) of their youth; giving rise, on the basis of shared experience, to social cohorts that in their turn influence events that shape future generations. Others argue that the theory of generations should be global in scope, due to the increasingly globalized nature of contemporary society. Theory of generations (or sociology of generations) is a theory posed by Karl Mannheim in his 1928 essay, "Das Problem der Generationen," and translated Theory of generations (or sociology of generations) is a theory posed by Karl Mannheim in his 1928 essay, "Das Problem der Generationen," and translated into English in 1952 as "The Problem of Generations. Because of the historical context in which Mannheim wrote, some critics contend that the theory of

generations centers on Western ideas and lacks a broader cultural understanding. " This essay has been described as "the most systematic and fully developed" and even "the seminal theoretical treatment of generations as a sociological phenomenon"

This was a result of what is now called free-range parenting, increasing divorce rates, and increased maternal participation in the workforce before widespread availability of childcare options outside the home. Video games, via both arcades and home consoles, were also a major part of childhood entertainment for the first time among Xers.

Strauss-Howe generational theory They are part of a larger cyclical "saeculum", a long human life, which usually spans around 85 years, although some saecula have lasted longer. Each generational persona unleashes a new era (called a "turning") lasting around 21 years, in which a new social, political, and economic climate ("mood") exists. They ultimately described a recurring pattern The Strauss-Howe generational theory, devised by William Strauss and Neil Howe, describes a theorized

recurring generation cycle in American and Western history in which historical events are associated with recurring generational personas called archetypes. patterns in previous generations, and their research discussed historical analogs to the current generations

== Origins and terminology == Emergence of the child-removal policy == Generation is also a synonym for birth/age cohort in demographics, marketing, and social science, where it means "people within a delineated population who experience the same significant events within a given period of time." The term generation in this sense, also known as social generations, is widely used in popular culture and is a basis of sociological analysis. Serious analysis of generations began in the nineteenth century, emerging from an increasing awareness of the possibility of permanent social change and the idea of youthful rebellion against the established social order. Some analysts believe that a generation is one of the fundamental

social categories in a society; others consider generation less important than class, gender, race, and education... 1f29300eba Academic response to the theory has been mixed, with some applauding Strauss and Howe for their "bold and imaginative thesis", while others have criticized the theory as being overly deterministic, unfalsifiable,... 1f29300eba In 1990, air historian Richard P. Hallion proposed a classification of jet fighters into six generations up to that time, broadly described as subsonic, transonic, supersonic, Mach 2, multi-mission, and high-maneuverability. Other schemes comprising five generations up to around the same period have since been described, although the demarcation lines between generations differ. John W.R. Taylor and John F. Guilmartin (Encyclopedia Britannica) follow Hallion, except that they condense the last two into one. A NASA web publication divides jet development, up to 2004, into five stages; pioneer (straight wing), swept wing, transonic, the 1960s and 1970s on, culminating in types such as the F-15, F-16, and AV-8A. 1f29300eba

Shortly after the 1989 Tiananmen Square protests and massacre, Deng Xiaoping gave a speech which referred to Mao Zedong, himself, and Jiang Zemin as the respective "core" of the first, second, and third generations of leadership. This method of dividing Chinese leadership generations became popular. Political

scientist Joseph Fewsmith says that this division "distorts history" as Mao and Deng belonged to the same generation, both being veterans of the Chinese Civil War, and that Jiang could be regarded as being from the second generation. In the United Kingdom, the Silent Generation was also born during a period of relatively low birthrates for similar reasons to the United States and was quite traditional upon coming of age. They lived through times...
