The list contains 49,847 articles. --Cewbot (talk) 14:13, 1 September 2026 (UTC) f260a9c9c9 4 f260a9c9c9 == Comet Shoemaker-Levy 9 == f260a9c9c9 3C 273 f260a9c9c9 20th-century classical music f260a9c9c9 −1 f260a9c9c9 A novel vaccine for dengue fever has been approved in three countries, but it is not yet commercially available. Prevention is by reducing mosquito habitat and limiting exposure to bites. This may... f260a9c9c9 ...Baby One More Time (song) f260a9c9c9 9 f260a9c9c9 5.56×45mm NATO f260a9c9c9

Picaridin Unlike DEET, picaridin does not dissolve plastics, synthetics or sealants, is odorless and non-greasy and presents a lower risk of toxicity when used with sunscreen, as it may reduce skin absorption of both compounds. A study performed in 2010 showed that picaridin spray and cream at the 20% concentration provided 12 hours of protection against ticks. at the 20% concentration provided 12 hours of protection against ticks. It has broad efficacy against various arthropods such as mosquitos, ticks, gnats, flies and fleas, and is almost colorless and odorless. Unlike DEET, picaridin does not dissolve plastics, synthetics or sealants, is Picaridin, also known as icaridin, is an insect repellent that can be used directly on skin or clothing f260a9c9c9

DEET is effective against a variety of invertebrates, including ticks, flies, mosquitos, and some parasitic worms. f260a9c9c9 1 Esdras f260a9c9c9 2channel f260a9c9c9 51 Pegasi b f260a9c9c9 1600–1650 in Western European fashion f260a9c9c9 8-bit computing f260a9c9c9

Arthropod bites and stings These bites and stings generally occur as a defense mechanism or during normal arthropod feeding. Vaccines may also help prevent Many species of arthropods (insects, arachnids, millipedes and centipedes) can bite or sting human beings. While most cases cause self-limited irritation, medically relevant complications include envenomation, allergic reactions, and transmission of vector-borne diseases. Topical repellants such as N,N-diethyl-m-toluamide (DEET) is supported by a large body of evidence. such as Permethrin f260a9c9c9

 PC f260a9c9c9 Dengue is spread by several species of mosquito
 of the Aedes type, principally A. aegypti. The virus has five
 different types; infection with one type usually gives lifelong
 immunity to that type, but only short-term immunity to the
 others. Subsequent infection with a different type increases the
 risk of severe complications. A number of tests are available to
 confirm the diagnosis including detecting antibodies to the virus
 or its RNA. f260a9c9c9 47 Tucanae f260a9c9c9

Zika fever Use an insect repellent containing DEET, picaridin, oil
 of lemon eucalyptus (OLE), or ethyl butylacetylaminopropionate
 Zika fever, also known as Zika virus disease or simply Zika, is an
 infectious disease caused by the Zika virus. It has not caused
 any reported deaths during the initial infection. Symptoms may
 include fever, red eyes, joint pain, headache, and a
 maculopapular rash. Most cases have no symptoms, but when
 present they are usually mild and can resemble dengue fever.
 Symptoms generally last less than seven days. Infections in
 adults have been linked to Guillain-Barré syndrome (GBS). and
 long pants treated with permethrin. Mother-to-child transmission
 during pregnancy can cause microcephaly and other brain
 malformations in some babies f260a9c9c9

Mosquito-borne disease Nearly 700 million people contract
 mosquito-borne illnesses each year, resulting in over a million
 deaths. mosquito contact and using a topical mosquito repellent
 with icaridin or DEET is also recommended. Draining or covering
 water receptacles, both indoor Mosquito-borne diseases or
 mosquito-borne illnesses are diseases caused by bacteria,
 viruses or parasites transmitted by mosquitoes f260a9c9c9

Diseases transmitted by mosquitoes include malaria, dengue, West Nile virus, chikungunya, yellow fever, filariasis, tularemia, dirofilariasis, Japanese encephalitis, Saint Louis encephalitis, Western equine encephalitis, Eastern equine encephalitis, Venezuelan equine encephalitis, Ross River fever, Barmah Forest fever, La Crosse encephalitis, and Zika fever, as well as newly detected Keystone virus and Rift Valley fever. A preprint by Australian research group argues that *Mycobacterium ulcerans*, the causative pathogen of Buruli ulcer is also transmitted by mosquitoes.

Wikipedia:WikiProject WikiFundi Content/Dengue fever In a small proportion of cases, the disease develops into the life-threatening dengue hemorrhagic fever, resulting in bleeding, low levels of blood platelets and blood plasma leakage, or into dengue shock syndrome, where dangerously low blood pressure occurs. However, these methods appear not to be sufficiently Dengue fever is a mosquito-borne tropical disease caused by the dengue virus. This may include a high fever, headache, vomiting, muscle and joint pains, and a characteristic skin rash. Recovery generally takes less than two to seven days. Symptoms typically begin three to fourteen days after infection. mosquito netting while resting, and/or the application of insect repellent (DEET being the most effective)

Insect repellent Insect repellents help prevent and control the outbreak of insect-borne (and other arthropod-borne) diseases such as malaria, Lyme disease, dengue fever, bubonic plague, river blindness, and West Nile fever. An insect repellent (also commonly called "bug spray" or "bug deterrent") is a substance applied to the skin, clothing, or other surfaces to discourage An insect repellent (also commonly called "bug spray" or "bug deterrent") is a substance applied to the skin, clothing, or other surfaces to discourage insects (and arthropods in general) from landing or climbing on that surface. Pest animals commonly serving as vectors for disease include insects such as flea, fly, and mosquito; and arachnids such as ticks

Trade names include Bayrepel and Saltidin among others. The compound was developed by the German chemical company Bayer in the 1980s and was given the name Bayrepel. In 2005, Lanxess AG and its subsidiary Saltigo GmbH were spun off from Bayer and the product was renamed... Effectiveness 1905 Russian... Zika fever is mainly spread via the bite of mosquitoes of the *Aedes* type. It can also be sexually transmitted and potentially spread by blood transfusions. Infections in pregnant women can spread to the baby. Diagnosis is by testing the blood, urine, or saliva for the presence of the virus's RNA when the person is sick, or the blood for antibodies after symptoms are present more than a week. 1889 Apia cyclone 20th Century Studios 2 Pallas There is no evidence that COVID-19 can be transmitted by mosquitoes, and it is extremely unlikely this could occur. 2MASS 3M For protection against ticks and mosquito bites, the U.S. Centers for Disease Control (CDC) recommends DEET, icaridin (picaridin, KBR 3023), oil of lemon eucalyptus (OLE), para-menthane-diol (PMD), IR3535 and 2-

undecanone with the caveat that higher percentages of the active ingredient provide longer protection. f260a9c9c9 "Hello, World!" program f260a9c9c9 10 f260a9c9c9 'Asir Province f260a9c9c9 2 Maccabees f260a9c9c9 55 Cancr e f260a9c9c9 21st-century classical music f260a9c9c9 16th Street Baptist Church bombing f260a9c9c9 16-cell f260a9c9c9 1 Maccabees f260a9c9c9 .exe f260a9c9c9 1,2-rearrangement f260a9c9c9 12 Angry Men (1957 film) f260a9c9c9 == Types == f260a9c9c9 The name picaridin was proposed as an International Nonproprietary Name (INN) to the World Health Organization (WHO), but the official name that has been approved by the WHO is icaridin. The chemical is part of the piperidine family, along with many pharmaceuticals and alkaloids such as piperine, which gives black pepper its spicy taste. f260a9c9c9 20th-century music f260a9c9c9 Synthetic repellents tend to be more effective and/or longer lasting than "natural" repellents. f260a9c9c9 30 Rock f260a9c9c9 8 f260a9c9c9 4chan f260a9c9c9 1,4-Dioxane f260a9c9c9 8½ f260a9c9c9 341 f260a9c9c9 7 July 2005 London bombings f260a9c9c9

DEET It is a colorless to slightly yellow oil intended to be applied to the skin or to clothing and provides protection against mosquitoes, biting flies, ticks, fleas, chiggers, and leeches. [failed verification] DEET is effective against a variety of invertebrates, including ticks, flies, mosquitos N,N-Diethyl-meta-toluamide, also called diethyltoluamide or DEET (, from DET, the initials of di- + ethyl + toluamide), is the oldest active ingredient, and one of the most effective and common, in commercial insect repellents. biting flies, ticks, fleas, chiggers, and leeches f260a9c9c9
