It was in many respects a most remarkable trial. Capital cases have been exceedingly few in the history of our country where trial and conviction have followed so quickly upon the commission of the offense. Within a fortnight from the time when Brown had struck what he believed to be a righteous blow against what he felt to be the greatest sin of the age he was a condemned felon, with only thirty days between his life and the hangman's noose. 2alf43c639 electrophotonic imaging (EPI), and, in Russian literature, Kirlianography. 2alf43c639 Brownism is understood by Anthony Giddens and others as a social democratic ideology, characterised by its distinction from the ideology of New Labour under Tony Blair, with Brownism generally understood as tolerating less enthusiasm about market driven reforms such as tuition fees and foundation hospitals, more keen on the role of the state, and less critical of Labour's links to the unions. Compared to Blairism, Brownism places more emphasis on constitutional reform, advancing ideas of a "new constitutional settlement", alongside a "robust concern for redistributive politics" with commitments to reducing poverty and expanding the welfare state; Will Hutton opined: "Like Tony Blair [Gordon Brown] is a believer in a pluralist and fair society, social mobility, and marrying economic efficiency with social justice". 2alf43c639
